Delivering a People-Centred Land Transport System

## We are on Track!

In this issue, we will share on the construction progress for both the road tunnels as well as the flyover.

With the support from the local communities, the project is able to proceed smoothly. Looking at the schedule, we are happy to say that "We are on Track!"

Besides the residents and business operators, our team also received visitors from Hougang CCC & Friends of LTA to the Project Community & Control Centre (PC<sup>3</sup>). We are happy to share that we welcomed the 700<sup>th</sup> visitor on 4 February 2010 during a visit by the Workplace Safety & Health Council (WSHC). The visit was held in conjunction with their WSHC bizSAFE Convention 2010.

## Notice the change...

Traffic layout after diversion

You may have noticed that we have temporarily diverted the traffic at the Woodsville Interchange since January 2010. This is a major phase of temporary traffic diversion in order to facilitate the construction of the road tunnels and flyover.

This traffic arrangement will remain for the next 18 months and it is essential to facilitate the construction of the road tunnels, particularly the segment under the existing Pan-Island Expressway (PIE) flyover.

The roads leading Serangoon Road towards MacPherson Road and Upper Serangoon Road towards Bendemeer Road have been realigned and diverted as shown in the plan above.

## Construction of Flyover

As part of the upgrading works, we will also be constructing a 400-metre long single-lane flyover from Jalan Toa Payoh to Jalan Kolam Ayer. The construction has commenced since July 2009 and is currently progressing well.

To facilitate the construction, some night works involving the launching of the pre-cast concrete beams will be carried out and these works will require temporary road closure and traffic diversion. Coordination, issuance of the necessary advance notifications and placement of adequate signages will be done to minimise any inconveniences.

## Construction of Road Tunnels

Excavation for road tunnels (Bendemeer Road)

We are pleased to share that we have completed the Diaphragm Wall of the road tunnel and our project is well underway with the excavation and construction for the remaining structures of the road tunnels.

We have begun with the excavation for the road tunnels along Serangoon Road and Bendemeer Road. We have also completed substantially the construction of the base of the tunnel along Serangoon Road and Bendemeer Road.

## Project Community & Control Centre (PC<sup>3</sup>)

Over the past months, we have received more than 700 visitors and we would like to thank you for your support and interest in the project. Moving forward, we will be planning for more community activities and we look forward to welcome you to the PC<sup>3</sup>.

**A big WELCOME to our visitors!**
