# LOCATION PLAN

Land Transport Authority

## BRIDGE OVER SUNGEI SERANGOON CONNECTING BUANGKOK DRIVE TO TAMPINES ROAD

# THE PROJECT

The Land Transport Authority is currently improving the accessibility of Buangkok Drive (from Upper Serangoon Road to Tampines Road) through the construction of the following road infrastructure:

- Approximately 200m bridge across Sungei Serangoon;
- Creating a roadway over landfill area;
- Flyover across Kallang Paya Lebar Expressway (KPE) and
- Various slip roads adjoining KPE including a vehicular underpass.

The work is scheduled for completion by first quarter of 2009.

*Artist impression of the Bridge over Sungei Serangoon*

*An illustration of the Vehicular Underpass*

Upon completion, the new road will improve the accessibility of residents living in Sengkang and Punggol new towns. Travel time taken by motorists to the city will be reduced.

With the re-direction of traffic to the new road and KPE, traffic along Tampines Expressway will also improve. The new road will also provide quicker access to future industrial development in the surrounding area.

## ENVIRONMENTAL-FRIENDLY CONSTRUCTION METHOD

*Slope Protection & Silt Fence for Construction of Flyover Bored Piles*

*Using sedimentation tank for better environmental control*
