

ERP Changes To Manage City Congestion

**Effective
7 July 2008**

From **7 July 2008** onwards, the following ERP changes will be made to better manage traffic congestion in the city.

New ERP Gantries

Five new ERP gantries running roughly along the Singapore River will come into operation from 6pm – 8pm, separating the commercial and shopping areas (e.g. Suntec) from the office-based areas (e.g. Shenton Way / Robinson Road). This will reduce evening through-traffic using the city area.

New ERP Criteria

The following new ERP criteria will apply to ERP gantries in the city area:

- a) The 85th percentile speed measurement method will be adopted to measure actual traffic conditions for ERP rate reviews, instead of average speeds, ensuring that motorists will experience smooth travel on ERP-priced roads at least 85% of the time.
- b) ERP rate adjustments, if triggered, will be \$1 instead of \$0.50, and the starting charge for new ERP gantries will be increased from the current base rate of \$1 to \$2.

As a result of applying the new ERP criteria, 7 out of 24 half-hour time slots (from 8 am – 8 pm) during the weekdays in the CBD would see ERP rate increases.

ERP on Saturdays

ERP will be implemented on Saturdays for the Bugis-Marina area to better manage traffic in the area.

Public Transport Alternatives

LTA has worked with the public transport operators to make immediate improvements to the public transport system. These include:

- introducing more premium bus services
- increasing bus service frequencies
- more bus lanes
- more train trips during peak hours
- the introduction of Bus Service 128 to ply along the southbound section of the North-South East-West Line

NEXT ERP RATE REVIEW

There will be no quarterly ERP rate revision in August 2008 for all ERP gantries. The next ERP rate revision will take place in November 2008.
